

Notes

↳ various virtual instances
(based on) / parts { api file
/ users { api file
/ employees { api file

Multiple API calls

↳ sequential
↳ non-sequential (random)

children
↳ root + obj

Class Based Components Lifecycle Components

getDerivedStateFromProps
Mounting
↳ renders in VDOM
↳ componentWillMount
↳ componentWillMount
↳ render()

↳ componentDidMount

1) useEffect(fn, [])

update
state changes
componentWillReceiveProps
shouldComponentUpdate()
componentWillUpdate
render()
getSnapshotBeforeUpdate

componentDidUpdate

2) useEffect(fn, [state])

Unmounting

componentDidUnmount()

useEffect(() => {})

1, 2, 3

React 17
↳ get snapshot before update
↳ get derived state from props
